Dear Sirs:—Having taken your Tonic at intervals during the past two years I have pleasure in being able to certify that it has proved a distinct success. Acting upon the recommendation of my medical adviser to take a Tonic when necessary, I choose the Minerva, and have every reason to be satisfied with the result; so much so that I always keep it in the house. When from stress of work I feel run down I have recourse to the Tonic, which invariably has the desired effect, as after a few doses I am right again for some months. Feeling that the Tonic has done me much good it will be a pleasure to recommend it, and I have no objection to your publishing this report.

## FROM THE DEAD

### Remarkable Case of Ap- parent Restoration.

Burial in Snow at the Last Gasp—  
A Doctor's Desperate Ex-  
pedient a Success.

HARTFORD, CONN.—Dr. John B. Boucher told the Hartford Medical Society recently how he had raised a man from the dead by burying him in snow.

The patient was Charles F. Robertson, of 23 Buckingham street, who had been ill for weeks from pneumonia. When he was beginning to recover, his second lung became affected, and the relapse appeared to have a fatal ending. Apparently he had passed through all the last stages of the disease.

His ravings had ceased, his temperature was 107, his pulse had begun to weaken, his breath came in short gasps and every evidence of the end was at hand. At nine o'clock the last test to show life, that of the reflex action of the eyeball, had failed, and the nurse informed the doctor that the man was practically dead. The family took the fact for granted and preparations were started to quickly remove the lifeless body.

To the doctor there was one desperate hope left. Placing a rubber blanket under the man, he caused snow to be brought in and made into a bed, on which he laid the patient, stripped naked. Not a quiver of an eyelid, not a single gasp, came as he was laid in the frigid mass. More snow was brought. It covered his arms, his legs and his body. Everywhere the mass was packed tightly around him. The order was "keep him there until his temperature goes down to 101."

For forty-five minutes the man lay in the snow with no signs of returning life. In fact, every one believed him dead. At the end of that time the doctor had the snow taken away, and again tried the reflex action test. As he put his finger on the eye, the lid quivered, and a minute later the first flickering pulse sent a thrill through those who were anxiously waiting.

Then came another surprise. The doctor, a man of experience, suddenly struck the insensible man a blow on the face. The eyes opened.

"Who am I?" asked the physician. "Hello, doctor!" said the patient. Mr. Robertson is still very ill, but the crisis is past and he is on the road to recovery.

## A STOCK FLURRY. How a Bit of a Panic Occurs in New York.

NEW YORK, April 7.—Paper profits melted away in Wall street today while a flurry that almost amounted to a panic carried prices on the Stock Exchange downward with a rush. The position assumed by the banks and other lenders of money, regarding loans upon the shares of industrial companies and some of the so-called "specialties" in which there has been speculation recently, precipitated the selling of these shares. This selling affected sympathetically the entire list of stocks dealt in on the Exchange to a greater or less degree. Inverted pyramids built by the utilization of stocks were toppled over in all directions until the interests identified with the concerns whose shares suffered most came into the market as buyers, and succeeded in checking the decline.

## EXPERIMENTING ON PATIENTS.

Investigation Ordered by Prussian Minister of Education.  
BERLIN, April 8.—Dr. Bosse the Prussian Minister of Education, has ordered an investigation into Professor Fester's charges that many scientists, including those of the Breslau University clinic and the German hospitals, indulge in dangerous experiments with patients. The matter came up in the Reichstag on March 11th, when Dr. Bosse promised an investigation. Since then a mass of new evidence has been produced, involving a number of the best known polyclinics and hospitals, some of the experiments mentioned being with cholera and other deadly germs.

## HOSPITAL MEN FOR MANILA.

LEAVENWORTH, Kas., April 8.—Orders to send twenty-five members of the hospital corps from Fort Leavenworth to Manila were received at Fort Leavenworth today from the War Department. They will probably depart tomorrow, going via San Francisco.  
GREENVILLE, S. C., April 8.—Fifty-one men from the Second Hospital Corps left Camp Wetherill today under orders to proceed to Manila and join in general hospital work in the Philippines. At New Orleans they will be joined by fifty men from the First Division Hospital Corps and the whole party will proceed to San Francisco to embark for Manila.

## MARINES FOR MANILA.

PHILADELPHIA, April 8.—Fifty marines will leave the League Island Navy Yard tomorrow en route to Manila. They will be joined by 200 more

in New York and proceed to San Francisco. From there they will sail for the Philippines to join the garrison now forming in Cavite. This is the first installment of 1000 men to be sent.

## DEWEY WANTS MORE SUPPLIES.

WASHINGTON, April 7.—Admiral Dewey has cabled the Navy Department, asking that six months' engineering supplies be sent to him at Manila. The department will probably use the Buffalo, now on her way from Manila to New York, for the carriage of these stores. The Admiral's request is an indication of his belief that it will not be possible to materially diminish the American fleet in the Philippines in the near future.

Only a Spider.  
At the Hilo hotel recently a pretty New York girl complained of a "stuffed thing" that she thought was placed as an ornament on the piano. A boy responded and frightened away an enormous spider. The young lady says the spider was the size of a auer. It may have been. The explanation was made that the spider in all houses was regarded as friendly and that even the little lizards were liked for their fondness of the mosquito.
